The smart choice for better hearing in noise

G8 hearing aids use the latest generation of Multi-Track Processing, with Auto Optimization, for better speech understanding in noisy social situations.

R Li 8 – the latest generation for even better hearing in noise

Hearing aid users understand the challenges associated with hearing in noisy social situations. Our G8 platform is specifically designed to address these challenges, combining the latest generation of our revolutionary Multi-Track Processing with Auto Optimization to fully automatically provide even better speech understanding in noisy social situations.

The next level of speech understanding

Designed to address the most important aspect of hearing in noise, our G8 platform takes hearing in noisy social situations to the next level. The latest generation of Multi-Track Processing can isolate and process multiple speakers at once, while balancing environmental sounds.

Thanks to Auto Optimization, your G8 hearing aids can now automatically optimize the right sounds and features, at the right time, for the best possible hearing experience – without any extra input!

The latest connectivity for ultimate convenience

G8 hearing aids feature diverse connectivity options, including MFi for iOS and ASHA for Android. This means you can seamlessly answer calls and stream audio content directly from your smartphone.

Together with Lithium-Ion rechargeability, G8 hearing aids are the smart choice for better hearing in any noisy situation.
